PREFACE

The attached Annex contains all the special provisions of the present tariff schedule which are difficult to incorporate in the proposed Schedule but which remain an important feature of the new custom classification system.(1)

The Annex is divided into five parts. Part 1(a) consists of the statutory end-use items recommended by the Board, in accordance with the Letter of Reference. These include the annex items relevant to Chapters 67 to 98, Phase III of this inquiry, as well as those recommended by the Board in its Phase I and Phase II reports. Special provisions other than end-use, including those designated by the Governor in Council, are listed in Part 1(b). The items of Part 1(a) and (b) will be the subject of further examination and a public inquiry in Phase V of Reference 163. Temporary end-use items of the Customs Tariff included in the Annex are listed in Part 1(d), while current tariff items under the Chemicals and Plastics Tariff Reduction Order are contained in Part 1(e).

The segments of the Annex dealing with statutory end-use items and special provisions are followed by cross-references linking the numbers of the Annex to the tariff item numbers of the Customs Tariff and vice versa.

Part 2 lists the tariff lines subject to the provisions of the Machinery Duty Remission Program. The tariff lines of the proposed Schedule subject to the GATT Agreement on Trade in Civil Aircraft and to the Automotive Products Trade Agreement are enumerated in Parts 3 and 4 respectively. The numbers of the relevant HS lines are those of the draft Schedule as referred originally to the Board. The listed lines do not reflect any changes in numbers recommended by the Board resulting from its inquiry. Finally, Part 5 contains the Customs Tariff items eligible for drawback of duties paid.

NOTES

The word "forcing" refers to an accelerated program of cultivation wherein plants are grown outside their usual or normal season. In addition, the term is applied to a process of cooling and heating cycles which simulate the growing and dormant conditions of nature.

The expression "growing on" has two meanings. The first is that of a "controlled process" (to the extent that plants may be protected and watered) over a period of time during which the natural growth of a plant from one stage in its life cycle to the next stage occurs. Secondly, it is that "controlled process"
